

DBDH

The District Energy Go-to-Platform

DBDH

Danish Board of District Heating

About DBDH

DBDH promotes district energy for a sustainable city transformation.

We represent the leading actors of the district energy sector, and identify, inform and facilitate partnerships between our members and partners in more than 70 countries. Through co-operation, DBDH strengthens the export of Danish technology and knowledge, consequently providing a brighter future for the environment globally while creating jobs and growth.

Hot | Cool

Hot Cool is a fully digitalized magazine and the centerpiece of DBDH's Go-to-Platform for knowledge and information about district heating and cooling.

Hot Cool carries the many articles and deep knowledge provided by experienced, international practitioners, and professionals. Hence, the magazine informs and updates the district heating and cooling industry about the latest ideas and developments.

Platform users include management from utilities, politicians, directors, and other decision-makers as well as employees and other actors from the district heating and cooling sector worldwide.

Members

Testimonials

//

A DBDH webinar helped German municipalities to better understand how to fulfill their role and obligations in relation to heating planning.”

— Dr. Holger Krawinkel, Mannheim

How can we support your city?
